## **Luphenil**

### **Skin regeneration and protection**

#### **Ingredients:**

Petrolatum, Aqua, Paraffinum Liquidum, Urea, Aluminium Chlorohydrate, Zinc Stearate, Cera Alba, Panthenol, Cetyl Alcohol, Allantoin, Bisabolol, Pantolactone

#### **Properties and Range of Application**

##### **Luphenil®**

- a water-oil-emulsion, supporting the skin's own protective function and its natural regeneration's capacity
- For dry and very damaged skin
- Stimulates the regeneration of the skin even in case of allergies, eczema and other inflammatory skin diseases
- Normalizes the sebum production of the skin eliminated by frequent washes and handling of harmful substances
- Restores the balance of the very important natural water-lipid protective layer of the skin thus stimulating the natural skin's own defences
- Soothing effect on stressed skin
- Do not use immediately before putting on protective gloves
- Especially suitable for daily use in
  - hospital departments and at the doctor's practice
  - old peoples home and nursing homes
  - cleaning services

#### **Mode of Application**

Use Luphenil as follows before long breaks (at least 15 minutes) and at the end of work: Clean the hands/skin with a mild washing lotion (Majola for example), then spread a thin layer of Luphenil evenly on the skin and rub it in. First apply Luphenil on the back of the dry hands giving special attention to the areas between the fingers. Use several times a day when the skin is damaged.

#### **Standard Packaging:**
