Wasa[®]- Reinigungsschaum Mousse

Propellant-free skin cleansing and care foam
Odour-binding

Product Information

Please read carefully!

Wasa®-Reinigungsschaum

INGREDIENTS

Aqua, Sodium Laureth Sulfate, Alcohol Denat., PEG-7 Glyceryl Cocoate, Dibutyl Adipate, Disodium Laureth Sulfosuccinate, Farnesol, Urea, Parfum, Disodium Cocoamphodiacetate, Sorbic Acid

PRODUCT FEATURES

- **Wasa®-Reinigungsschaum** is a slightly acidic cleansing foam with a pore-deep cleaning power.

As a result, the preparation is suitable for all skin types, eczematous, infectious skin diseases and wound beds are largely prevented.

- Maintains the skin's natural acid barrier for all skin types.
- Nourishes and protects the skin with moisturising and refatting substances.
- Odour-binding – deodorised.
- Mildly cleanses, even without the use of water.
- Can be applied without dispenser or water, can therefore be used anytime and anywhere.
- Environmentally friendly, because
 - it contains no propellant
 - all ingredients are biodegradable
 - of a highly economical consumption of cleaning-active substances
 - the packaging is made of easily disposable material
- By dispensing with other stabilizing components, the preparation may appear optically altered under the influence of light. This does not affect the quality or effectiveness of the wash lotion.

SCOPE OF APPLICATION

- For cleaning contaminated areas of the skin (e.g., incontinence, anus praeter, etc.), as well as normal cleaning of hands and skin.
- For soap-sensitive and chapped skin.
- For elderly and infirm care, for decubitus prophylaxis.
- For infant and child care.

INSTRUCTIONS FOR USE

Wasa®-Reinigungsschaum is applied to the skin directly or by wipe. Following application, the foam takes effect and removes contaminants after a brief period of operation. Wipe off any dissolved dirt with a soft, damp disposable wipe, then let dry.

Wasa®-Reinigungsschaum can also be used with water like any regular washing lotion. If necessary, apply a non-greasy skin cream (e.g., Majola®- H5 cream) afterwards.

SHIPPING UNIT/CONTAINER

18 x 200 ml-bottle with foam head
2 x 5 litre canister
